Comments/TA Provided:

Virtual visit on this date. We did a video walk through of the facility. There were 13 kids with 2 staff at the time of the visit. Children are 3-5years. Licensor called Monica later to discuss the things we weren't able to cover during the virtual visit. Monica stated they have a new sink in the classroom that has greatly improved the handwashing capabilities. She stated they are using a bleach solution and are using it on toys daily. She stated a staff member wipes down surfaces while the kids are outside mid day. We discussed central registry expires in March and fingerprints in May. Monica stated she will get those turned in soon. Licensor explained that she could email the central registries.
